System Requirements and Preparation

CGI Studio Package Installation/Unpacking Requirements

Please be aware of the following requirements when installing CGI Studio,

- Make sure you have administrator privileges.
- As some .dll files may be blocked by Windows due to security reasons, you may have to manually unblock individual .dll files to complete the installation process.
- For safety reasons, please notify your IT department when installing this software.

Software Development Environment Required

Software Development Environment for Host

Install the following software for host development if not yet available:

- Microsoft Visual Studio 2015 (Update 3) or 2017
- Microsoft Visual C++ 2015 Redistributable Package x64
- .NET Runtime 4.8 - Redistributable Package and .Net FW can be downloaded free of charge from http://www.microsoft.com/downloads/
- CMake 3.19.0 - CMake can be downloaded free of charge from http://www.cmake.org/
- Python 2.7.x or 3.6.5 (or higher)

> For execution only, redistributable package is sufficient. For widget development,
> MS Visual Studio (min. C++ and C#) or
> MS Visual Studio C++ Express Edition and MS Visual Studio 2015 (minimal) C# Express Edition is mandatory.

Software Development Environment for Target Platforms

Please refer to the Application Development section of this document for device specific target setup documentation.

Monitor resolution (recommended)

FHD(1920×1080) or higher display
