Cultures

In order to compose texts in different languages, a culture (language setting) must first be created.

(1)	Add Culture button	Add a new culture setting row.
(2)	Remove Culture button	Delete the selected culture setting row.
(3)	Search field	You can search for a specific text entry by entering any string into the search field.
(4)	Culture	You can select a language from the Culture drop-down menu. This language will serve as the target language for the localization.
(5)	Layout Direction	Selects the direction in which the text is displayed. Normally, the appropriate text orientation is selected automatically, depending on the selected Culture.

(6)	Translated Texts	Shows the number of text entries linked to the culture.
(7)	Owned by	The name of the solution for which this setting has made is displayed.
(8)	OK button	Use this button to save settings.
(9)	Cancel button	Use this button to close the dialog box without saving settings such as added or deleted cultures.

- Similar settings can also be made via the Culture Solution Options button on the toolbar.
- For information on how to set up multiple languages after setting up a culture, please click here.
