SafetyScene

Adds a new safety scene to the solution. The system creates the scene as a scene that supports the functional safety of the solution.

> This panel is displayed only if the safety feature is enabled in the Using Licenses panel.

Item	Description
Destination path	Specifies the folder in the solution where the system places the new item. Click **Browse...** to select an existing folder.
Name	Sets the name of the new item.
Description	Describes the new item in detail.
Annotations	Serves as storage for notes and other project-related information. The system exports the entered text to the HMI report.
URI	You can set any URI. If you enter a valid URI, clicking it launches the browser and displays the contents of the link.
Export Always	Specifies whether the system always includes this item as part of the asset.
Is Locked	Specifies whether the item is locked.
IsView	Specifies whether the scene is also used as a View.
