View

Adds a new **View** to the solution. In the **View Definition Editor**, you define the created View as a screen-level configuration by combining Scenes and existing Views.

Item	Description

Destination path	Specifies the folder in the solution where the system places the new item. Click **Browse...** to select an existing folder.
Name	Sets the name of the new item.
Description	Describes the new item in detail.
Annotations	Serves as storage for notes and other project-related information. The system exports the entered text to the HMI report.
URI	You can set any URI. If you enter a valid URI, clicking it launches the browser and displays the contents of the link.
Export Always	Specifies whether the system always includes this item as part of the asset.
